# LIVELY LEMONS

---

Lemon has been used in culinary and non-culinary purposes throughout the world for thousands of years.

Not only does Lemon have an uplifting and brightening scent which refreshes clothes and surfaces, it is also a natural cleaner and disinfectant.

# LEMONS – THE VERY USEFUL FRUIT

---

The acidity of Lemon juice can help remove alkaline “stains” like limescale and rust. This acidity also creates a hostile environment for some types of bacteria, including those associated with salmonella and E. coli.

Some bad smells such as fish or rotten vegetables are also alkaline in nature, so introducing acidity helps to neutralise the odour. This is why Lemon is often a hero note for many cleaning and wash products.

# SUNNY LEMON COLLECTION

---

Although this collection is very functional in its nature, we have taken a new spin on the lemon. The Sunny Lemon Collection is a selection of 6 refreshing and uplifting lemon fragrances, which tap into the healthy home trend.

This Collection is suitable for:

- Cleaning Products
- Wash products
