# SPRING HAS SPRUNG

---

Nothing marks the end of winter like a spring flower.

In spring we finally break away from our cosy state of hibernation and embrace the great outdoors.

And with the onset of spring, new life is breathed into the world.

Our sense of smell comes alive with the change in weather. The world wakes from its slumber, gardens begin to bloom and the rain gives life to the earth.

# THE SCENT OF SPRING

---

Spring flowers bring brightness and colour back into our lives, exuding a fragrant, magical quality.

These beautiful spring scents awaken our senses and reassure us that brighter days are on their way. Springtime scents are not just limited to florals, they also include earthy, fresh and aqueous fragrances which enliven our senses.

Whether it be the first delicate snowdrops or the bold and vivacious hyacinth, spring flowers herald the coming of warmer days and the positivity and opportunities that it offers.
